

Stephane PANNETRAT

" Electrical engineer, Stéphane PANNETRAT has developed his whole career within the wireless industry. He started in 2000 at ALCATEL Mobiles as an RF engineer in the Advanced Studies Department. Stéphane then joined SAGEM Mobiles where he created the radio communications and SAR test laboratory in 2002. He managed this entity until 2008 towards maximum measurement quality at both the R&D and pre-certification stages. His involvement in maximizing the laboratory efficiency led him to develop innovative measurement approaches, which resulted in several publications and patents. Stéphane also duplicated his laboratory at multiple sites in France and China and acted at the international level as the 3GPP representative of SAGEM on Over-The-Air testing. Entrepreneur at heart, Stéphane naturally came to co-found ART-FI SA and is the Chairman & CEO of the company."
