

Mounir TENIOU

" Electromagnetics engineer, Mounir TENIOU had a PhD in electromagnetics from Sorbonne Université in 2017. He worked on the design of antennas for space applications in collaboration with the french space agency (CNES) and with AIRBUS. After a one year postdoctoral contract between Sorbonne Université and the National University of Singapor (NUS), he joined ART-Fi in 2019 as an electromagnetics engineer in the R&D department. He is now head of the electromagnetics team within the R&D department. Mounir participates actively in standardization work related to RF exposure assessment at the European level (CENELEC) and at the international level (IEC)"
